LANGUAGE SKILLS

- Albanian
  Full professional proficiency (Mother tongue)
- English Full professional proficiency
  (Level C2)
- Italian Intermediate proficiency
  (Level B1)
- German Intermediate proficiency
  (Level B1)
- Spanish Beginner proficiency
  (Level A1)

PROGRAMMING

- Python (preferred prog. language)
- Ruby/Ruby on Rails
- Matlab
- C Programming
- C++ Programming
- PHP
- Haskell
- Flutter/Dart

Kevin Silaj

PROFESSIONAL EXPERIENCE

Junior Backend Developer
MOQO (December 2021 – Present)

- Implement new features that change the world of mobility. (Ruby on Rails)
- Active attendance in the agile development process of the team.
- Take ownership of my work, making sure that the code is clean and understandable to the team.
- Actively test my tasks. and teammates tasks by writing specs (automatic) and manually to assure that it works as expected.
- Active work in Frontend tasks (JS, Vue.JS)
- Daily teamwork spirit, by supporting and getting supports for each task, bringing ideas to the table and by participating in projects of our choice, that can benefit the company.

Google Ads Quality Specialist (Remote)
Virtusa & GIOS Technology (Sept 2020 – Mar 2021)

- Pitched ideas on how to improve performance and efficiency.
- Analysed and improved important Google Ads tasks.
- Gathered data and maintained the quality and correctness of multiple ads to decide which one is the most suitable for the viewer.
- Improved the quality of ads which occur mostly in Germany and USA.
- Classified data based on a particular criteria and made sure to exclude sensitive content ads.

Intern in Tech
Coffee Circle Gmbh, Berlin (Jul 2019 – Dec 2019)

- Actively engaged in Frontend development, working with motivated Frontend Developers in adding Javascript features such as Smarty and Pug. Contributed in the language selection feature of the website.
- Initiated the unit testing for the Shopware methods of the company, using PHPUnit for every function of the website.
- Collaborated with Data Engineers in implementing forecasting applications for the company's gear sales using Python and multiple forecasting methods, such as Facebook Prophet and experimented in other methods such as ARMA, ARIMA etc. Visualized the data using Python Dash and Plotly frameworks.
- Worked independently on a project that included Cloud Engineering Lambda functions implementation in Python, Web scrapping using Selenium Webdriver in Python to automatically migrate daily sales data from an application to the Google Cloud Warehouse Database.
- Gained experience in Agile Methodologies (Scrum) using Zube (almost identical to Jira).

TECHNOLOGY

- MacOS, Windows & Linux (Ubuntu)
- Github
- Microsoft Office & Office 365
- Amazon Web Services
- HTML & CSS & Javascript
- Angular (still learning)
